FlokiSpaceXswap Crypto-Currency

Written by the Flokispacexswap Dev Team

Version 1.0

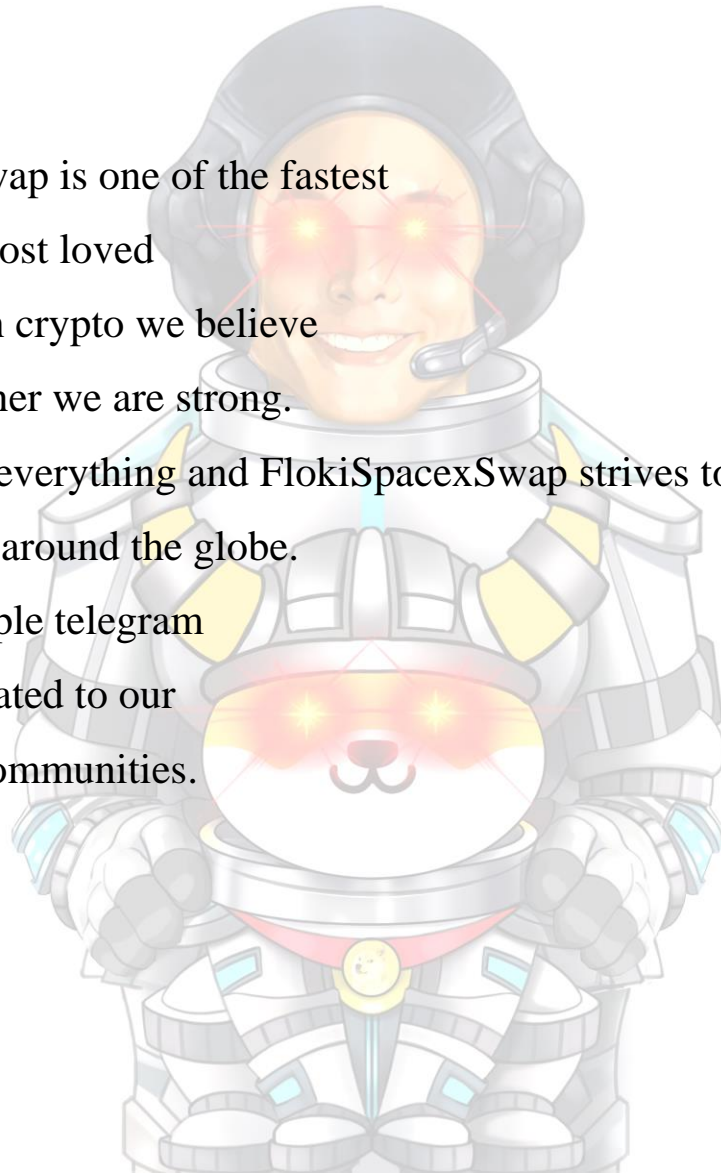

Date: April 1, 2022

COMMUNITY:

FlokiSpaceXSwap is one of the fastest growing and most loved communities in crypto we believe that only together we are strong.

Community is everything and FlokiSpaceXSwap strives to include everyone from around the globe.

We have multiple telegram channels dedicated to our international communities.

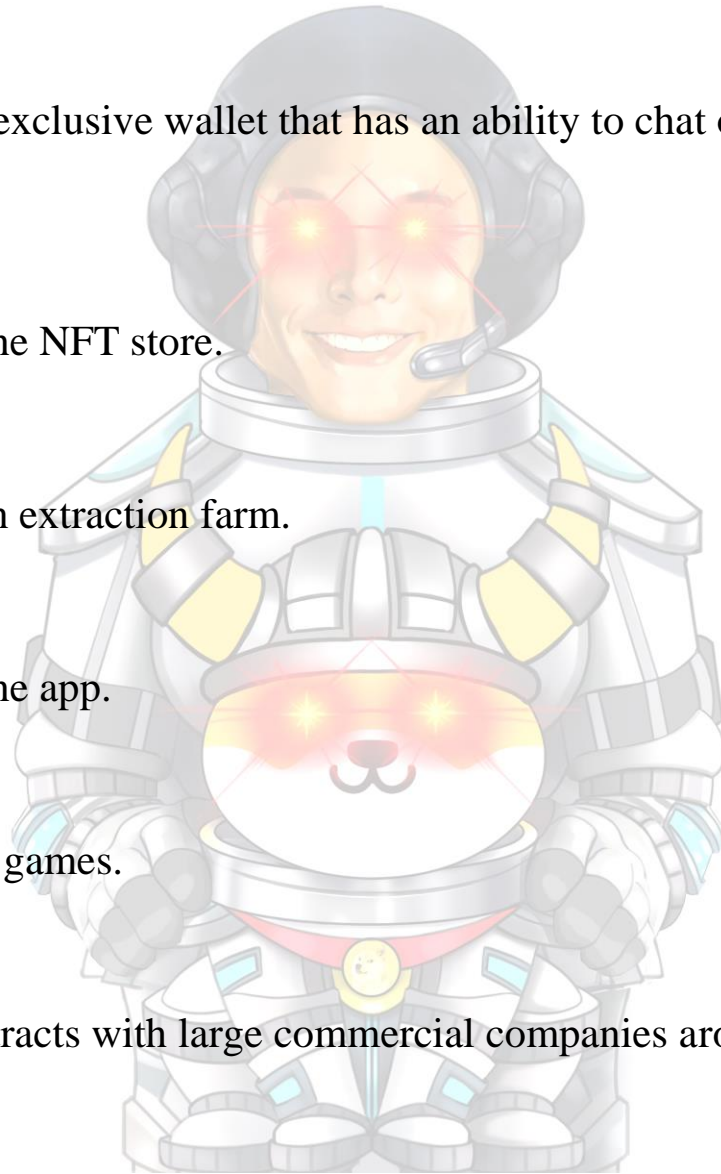

Our road map

FlokiSpaceXSwap is an anti-inflation token and it is designed in such a way that it becomes rarer over time with holding. Our plan is to burn 70% of the token in a short time. Our first step is creating a swap so that FlokiSpaceX token has independently a decentralized exchange and all the currencies can be traded with the lower transaction costs. The next plan of this project is creating an exclusive wallet that has an ability to chat on the blockchain for the users, so that the users can easily communicate to each other with lower costs. After developing the previous two steps, we will launch the NFT store. We will do everything for investors and holders of FlokiSpaceXSwap to make this project more attractive. After entering the NFT domain, we will enter the next step. Setting up an extraction farm on a platform with medium and long-term profitability is one of this project's plan which makes it the most attractive project. The next step is launching the app with various and up-to-date services, creating games, make contracts with large commercial companies around the world for buying and selling goods by FlokiSpaceXSwap. Entering to the world of Metavers and creating the new games, casinos and services that will surprise the world in the future. Finally creating an independent blockchain. We will do our best to hit the above steps out of the ballpark. Needless to say, at the same time as the above, we will be listed after pre-sale on pancakeswap and then on uniswap. Our goal is to launch FlokiSpaceXSwap on the smart chain's and Atrium's platform and then it will be listed on all valid exchanges.

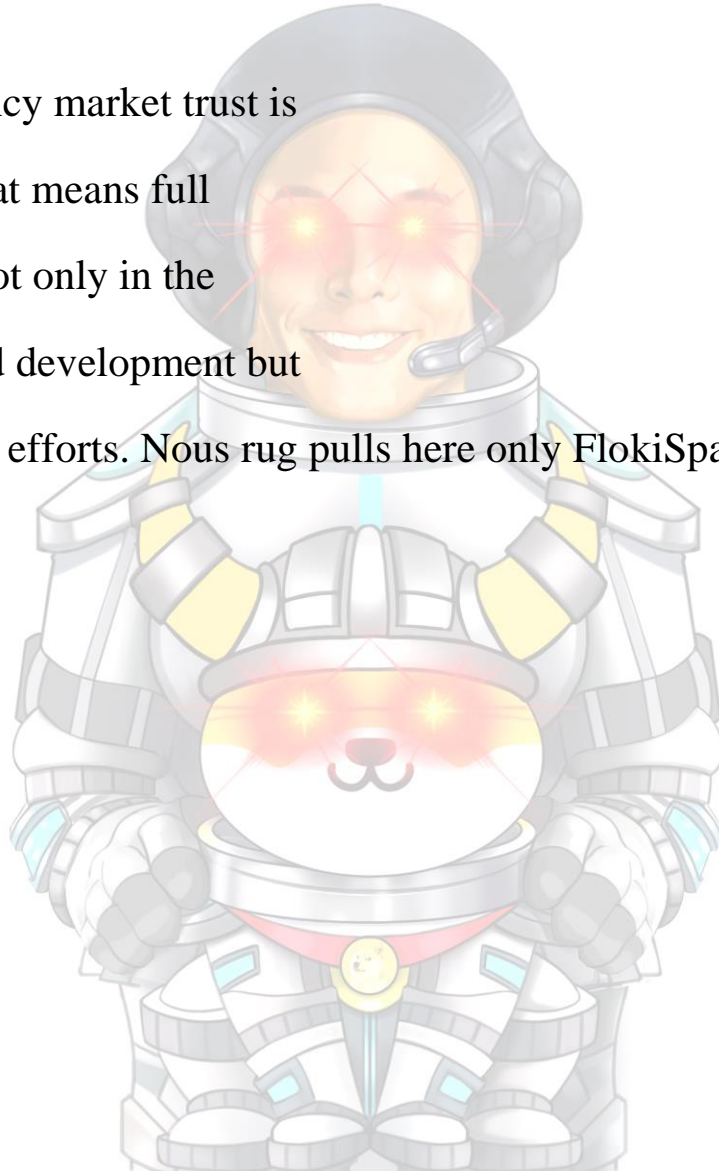

The roadmap focuses on the development of the technology, operations infrastructure, new partnerships, and marketing initiatives.

1. Creating a decentralized exchange.
2. Creating an exclusive wallet that has an ability to chat on the blockchain.
3. Launching the NFT store.
4. Setting up an extraction farm.
5. Launching the app.
6. Creating the games.
7. Making contracts with large commercial companies around the world.
8. Entering to the world of Metavers.
9. Creating an independent blockchain.

TRUST:

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts. Nous rug pulls here only FlokiSpaceSwap.
